#### DETAILED ACTION

## **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Information Disclosure Statement

The references cited on PTO 1449 have been considered.

#### **CLAIM REJECTIONS**

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 5-6 are rejected under 35 USC 102 (b) as being anticipated by Onozato (US Pat. 5,250,957).

Onozato discloses in Figure 4 an ink tank comprising:

- an ink containing portion (10) for containing ink;
- an ink lead-out portion (16, 17) for leading out ink in said ink containing portion (10) to the outside;
- an electrode inlet portion (24) for inletting an electrode (25) into said ink containing portion (10), said electrode inlet portion (24) being different from said ink lead-out portion (16, 17),

Application/Control Number: 10/729,304 Page 3

Art Unit: 2861

wherein said ink lead-out portion and said electrode inlet portion are connected through a conductive member (14, 23, 27, 29);

- a conductive ink lead-out member (12) to be inserted into said ink lead-out portion (16, 17);

- an electrode (25) to be inserted into said electrode inlet portion (24);

- a circuit portion (27, 29) for applying voltage between said ink lead-out member (12) and said electrode (25) and for measuring an electric current in a route, wherein the electric current measured by said circuit portion changes in accordance with the presence and absence of ink in said ink tank, and the attachment and detachment of ink tank to and from said ink jet printer; and - wherein said ink lead-out member (12) is a hollow needle-type metallic member.

Claims 1-3 are rejected under 35 USC 102 (a) as being anticipated by Siemens AG (DE Pat. GM 80 23 471).

Siemens AG discloses in Figures 3- 4 an ink tank comprising:

- an ink containing portion (2) for containing ink;

- an ink lead-out portion (6) for leading out ink in said ink containing portion (2) to the outside;
- an electrode inlet portion (11) for inletting an electrode (7) into said ink containing portion (2), said electrode inlet portion (11) being different from said ink lead-out portion (6), wherein said ink lead-out portion and said electrode inlet portion are connected through a conductive member (8) (Figure 3);
- wherein said conductive member (8) is a film having conductive substance coated therefor (Figure 3); and
- wherein said ink lead-out portion (6) and said electrode inlet portion (11) are substantially sealed by said film.

#### Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's

Application/Control Number: 10/729,304 Page 4

Art Unit: 2861

disclosure. The prior art reference (US Pat. 6,102,517; US Pat. 5,997,121) cited in the PTO 892 form show an ink cartridge that is deemed to be relevant to the present invention. These references should be reviewed.

#### Allowable Subject Matter

Claim 4 would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims. These claims would be allowable because none of the prior art references of record discloses an ink tank comprising an ink lead-out portion and an electrode inlet portion, an ink absorbing member that are arranged to be in contact with a conductive film but not directly in contact with ink in an ink containing portion in the combination as claimed

#### **CONCLUSION**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Anh Vo whose telephone number is (571) 272-2262. The examiner can normally be reached on Tuesday to Friday from 8:00 A.M.to 6:00 P.M.. The fax number of this Group 2861 is (703) 872-9306.
